

MicroSpa: The Spa of the Future

MicroSpa is for people who want to look and feel good on a budget. Located in the Colonial Shoppes Bear Lake in Apopka, MicroSpa makes frequenting a spa affordable by using a revolutionary self-service concept that delivers savings because there are no technicians—only easy-to-use equipment for spa and tanning services that focus on skin health and overall well-being.

MicroSpa owner Sona (as in “sauna”) Patel grew up in Orlando and graduated from law school. She practiced real estate law in south Florida for eight years before moving back to Central Florida and opening MicroSpa.

Patel is someone who gives her all to everything she does. As a result, she’s no stranger to stress, and has been an avid consumer of relaxation products and services for years.

But due to a downturn in the real estate market, she couldn’t enjoy those services as often as she liked—too expensive. That’s when she began looking for affordable ways to de-stress and began researching the latest trends high-tech wellness and relaxation equipment. This search led to MicroSpa’s conception.

Patel always wanted to own a spa, and she would follow her dream. She uses her knowledge to help others achieve wellness and relaxation in an affordable way so that it becomes a regular part of their lives. While the MicroSpa may not involve a person giving the massage or applying tanning spray, the result is same or better—but at a fraction of the cost and time.

MicroSpa combines LED skin rejuvenation therapy, massage, tanning, spray tanning, skin hydration, body detoxification, and teeth whitening, all in an upscale, relaxing environment infused with aromatherapy and soothing spa sounds.

Tanning: Vitamin D deficiency affects a majority of North Americans and contributes to many disorders. MicroSpa’s lie-down and stand-up tanning units allow clients to get their Vitamin D in a controlled environment, free of dangerous UVC-rays. And MicroSpa uses the best lamps in the industry.

Spray Tanning: Each booth is equipped with the exclusive MagneTan Technology to ensure that every particle of the treatment adheres evenly to the body.

Massage: The EC3000 Cyber Relax massage chair from Japan is the latest and greatest in the world. It scans the body to prepare a customized massage, and then applies air pressure and kneading massage balls for a penetrating massage.

LED Phototherapy: This professional system maximizes the benefits of skin phototherapy through the use of up to 4,000 high-grade LEDs. Referred to as the “light vitamin” for the body, this process converts light energy into cellular energy to heal wounds and acne, and reduce wrinkles, stretch marks, and scars.

Hydration Spa Capsule: Infrared heat and dense steam infused with nutrients and oxygen are used to moisturize the skin. This system also helps with slenderizing by burning approximately 300 calories per session.

Teeth Whitening: MicroSpa’s system utilizes a powerful whitening agent and an accelerator lamp that leave teeth shades whiter.

Many of the “futuristic” devices at MicroSpa have been featured on *Oprah*, *Today* and *The Doctors*. The spa will continue to stay up to date with the latest devices for its members. Their next equipment focus will be on new high-tech weight-loss equipment.

Seminole Special!
